

SONOR®

Signature Series

The Signature Series comprises everything that is necessary for the perfection of sound and playing technique. This series is a breakthrough in the manufacturing of drums, of which we are very proud. As I feel personally responsible for this top-line, the drums are bearing my signature.

Signature drum sets are created by experts for professionals. For drummers who regard their drum set as a part of their message. For drummers who identify themselves with their instruments. A limited edition of distinction to which I proudly and confidently add my personal endorsement.

Horst Link

Signature Shell

The deep, 12-ply shells are the core of the Signature sound. Due to this careful construction, every shell has a high flexional strength. Signature drums have newly designed extra deep shells, ensuring a perfectly balanced sound volume and projection.

The Signature Sound

The construction of the Signature Series drum shells is different than that of conventional drums. The 12-ply shells are formed tension free from selected woods. Tension free means that the single plies form a solid sound unity, thus allowing the drum head an optimum of vibration. All Signature Series drums are available in two versions, giving the drummer a choice of two Signature Sounds: Heavy or Light. The Heavy shell made of beech with a thickness of 12 mms produces a mellow and dry sound. The Light shell, made of birch and only 7 mms thick, has a sound more responsive and direct. Both shells have extra deep dimensions, ensuring a perfectly balanced sound volume.

Signature Finish

The inner and outer plies of a drum also have an influence on the sound. Because of their special structure and their outstanding acoustic properties, we chose African Bubinga and Indonesian Makassar Ebony. Firmly joined to the basic plies they contribute to the balanced sound of the Signature Series.

Signature Warranty

Worldwide, the Signature Series is the first and only drum set with a 10-year limited warranty on materials and workmanship. This shows how much care is devoted to the construction of Sonor drums. From the stages of planning and testing, to production and service, one principle applies, quality.

Signature Snare Drums

Cat. No.	Shell sizes
HLD 588	14" x 8"
HLD 580	14" x 8"
HLD 581	14" x 6½"
HLD 582	14" x 6½"

HLD 580, HLD 581 in 12-ply wood shells, Heavy or Light, in African Bubinga (RH) and Makassar Ebony (EB). HLD 588, HLD 582, made seamless from ferro-manganese steel. All have parallel snare strainers, exchangeable jazz (24) and rock (22) snares, die cast rims,

24 tensions screws with "Snap-lock" (pat.) system, oscillographically tuned batter and snare heads, adjustable external muffler.

HLD 580 EB

HLD 581 RH
